Projects

Web Projects

■ Personal Portfolio

Developed a sleek and responsive personal portfolio website using HTML, CSS, and JavaScript, showcasing my professional resume, projects, and skills.

Project Link:- github.com/Sundarsinghbisht/Portfolio

■ Simon Game

Created a fully interactive Simon Game using HTML, CSS, and JavaScript, featuring dynamic color sequences and sound effects. The game includes responsive design and progressive difficulty to enhance user engagement

Project Link:- github.com/Sundarsinghbisht/Simon-Game

Python Projects

■ Automated Attendance System

Developed an automated attendance system using Python, OpenCV, NumPy, and face recognition technology. The system efficiently detects and recognizes faces in real-time, marking attendance with high accuracy and minimizing manual intervention.
